

parmit for Creek Haven

Introducing Parmit

Parmit is a state of the art estate management application built by a team of developers with the sole aim of redefining living and interactions within an estate for residents, security guards, service providers and estate managers etc.

Problem Statement

Parmit is designed to solve the following major problems.

Simplified Bill payment

Efficiently make and collect payments from residents without the hassle.

Access Control for Security

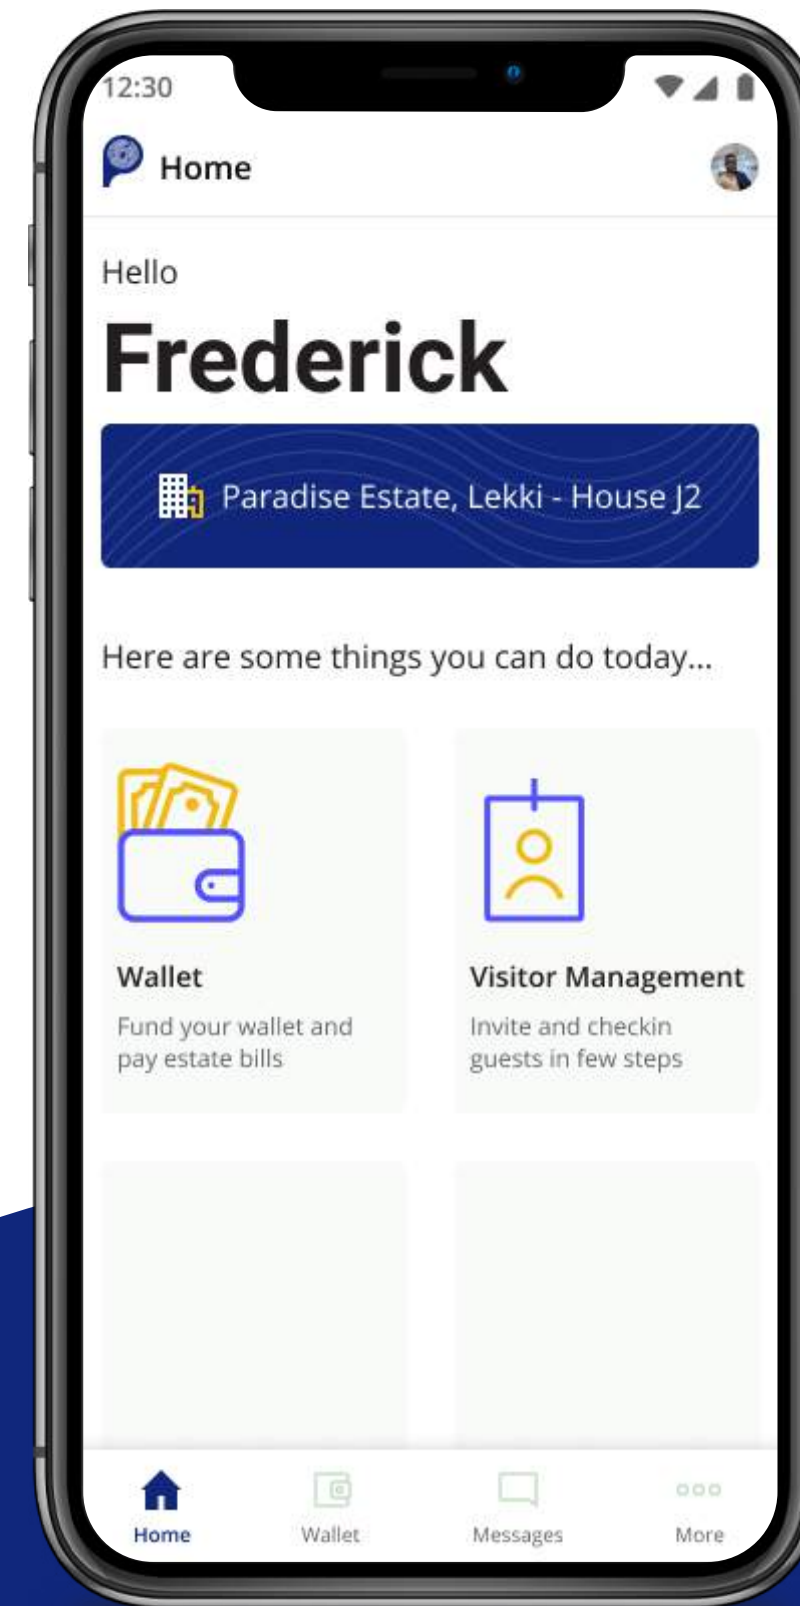

Everyone needs and deserves to feel safe especially in the comfort of their homes.

Personnel & Data Management

A better way to manage Estate staffs and estate records.

The next section of this document aims to highlight how Parmit is positioned to solve the problems listed above

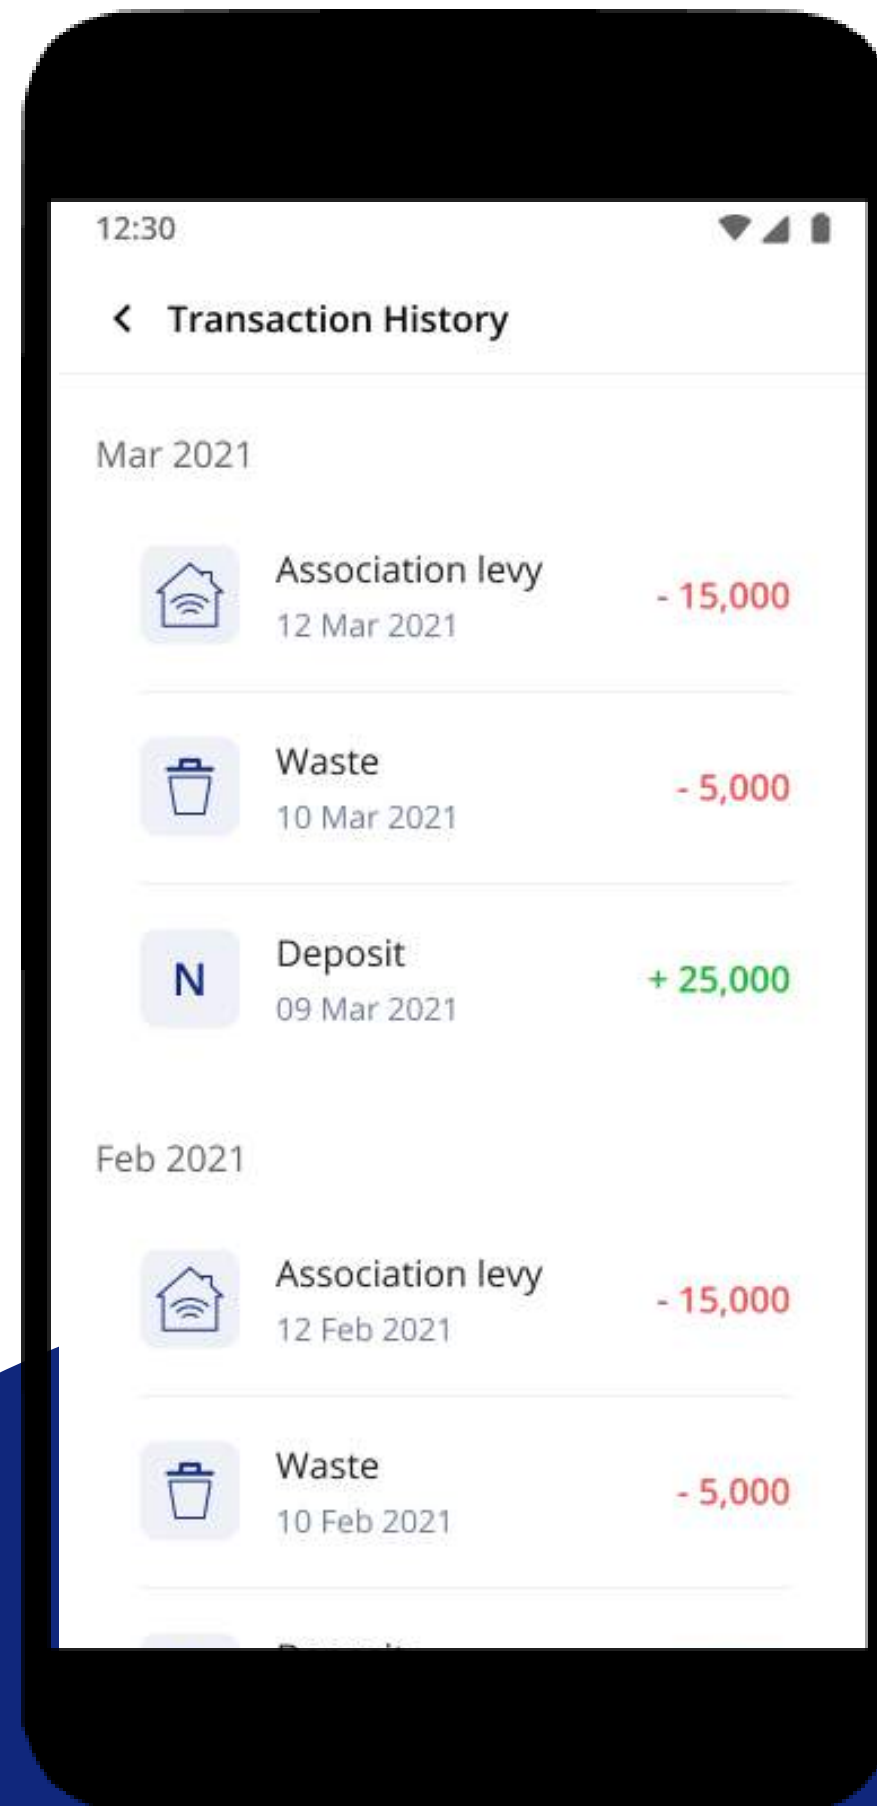

Parmit's Key Features

- *Bill Management*
- *Payment Wallet*
- *Guest Access Control*
- *Service Directory*
- *Admin Web Portal*

Bill Management

Bill management just got easier, the system solves one of the biggest challenges of Estate Managers.
Scroll down to find out how

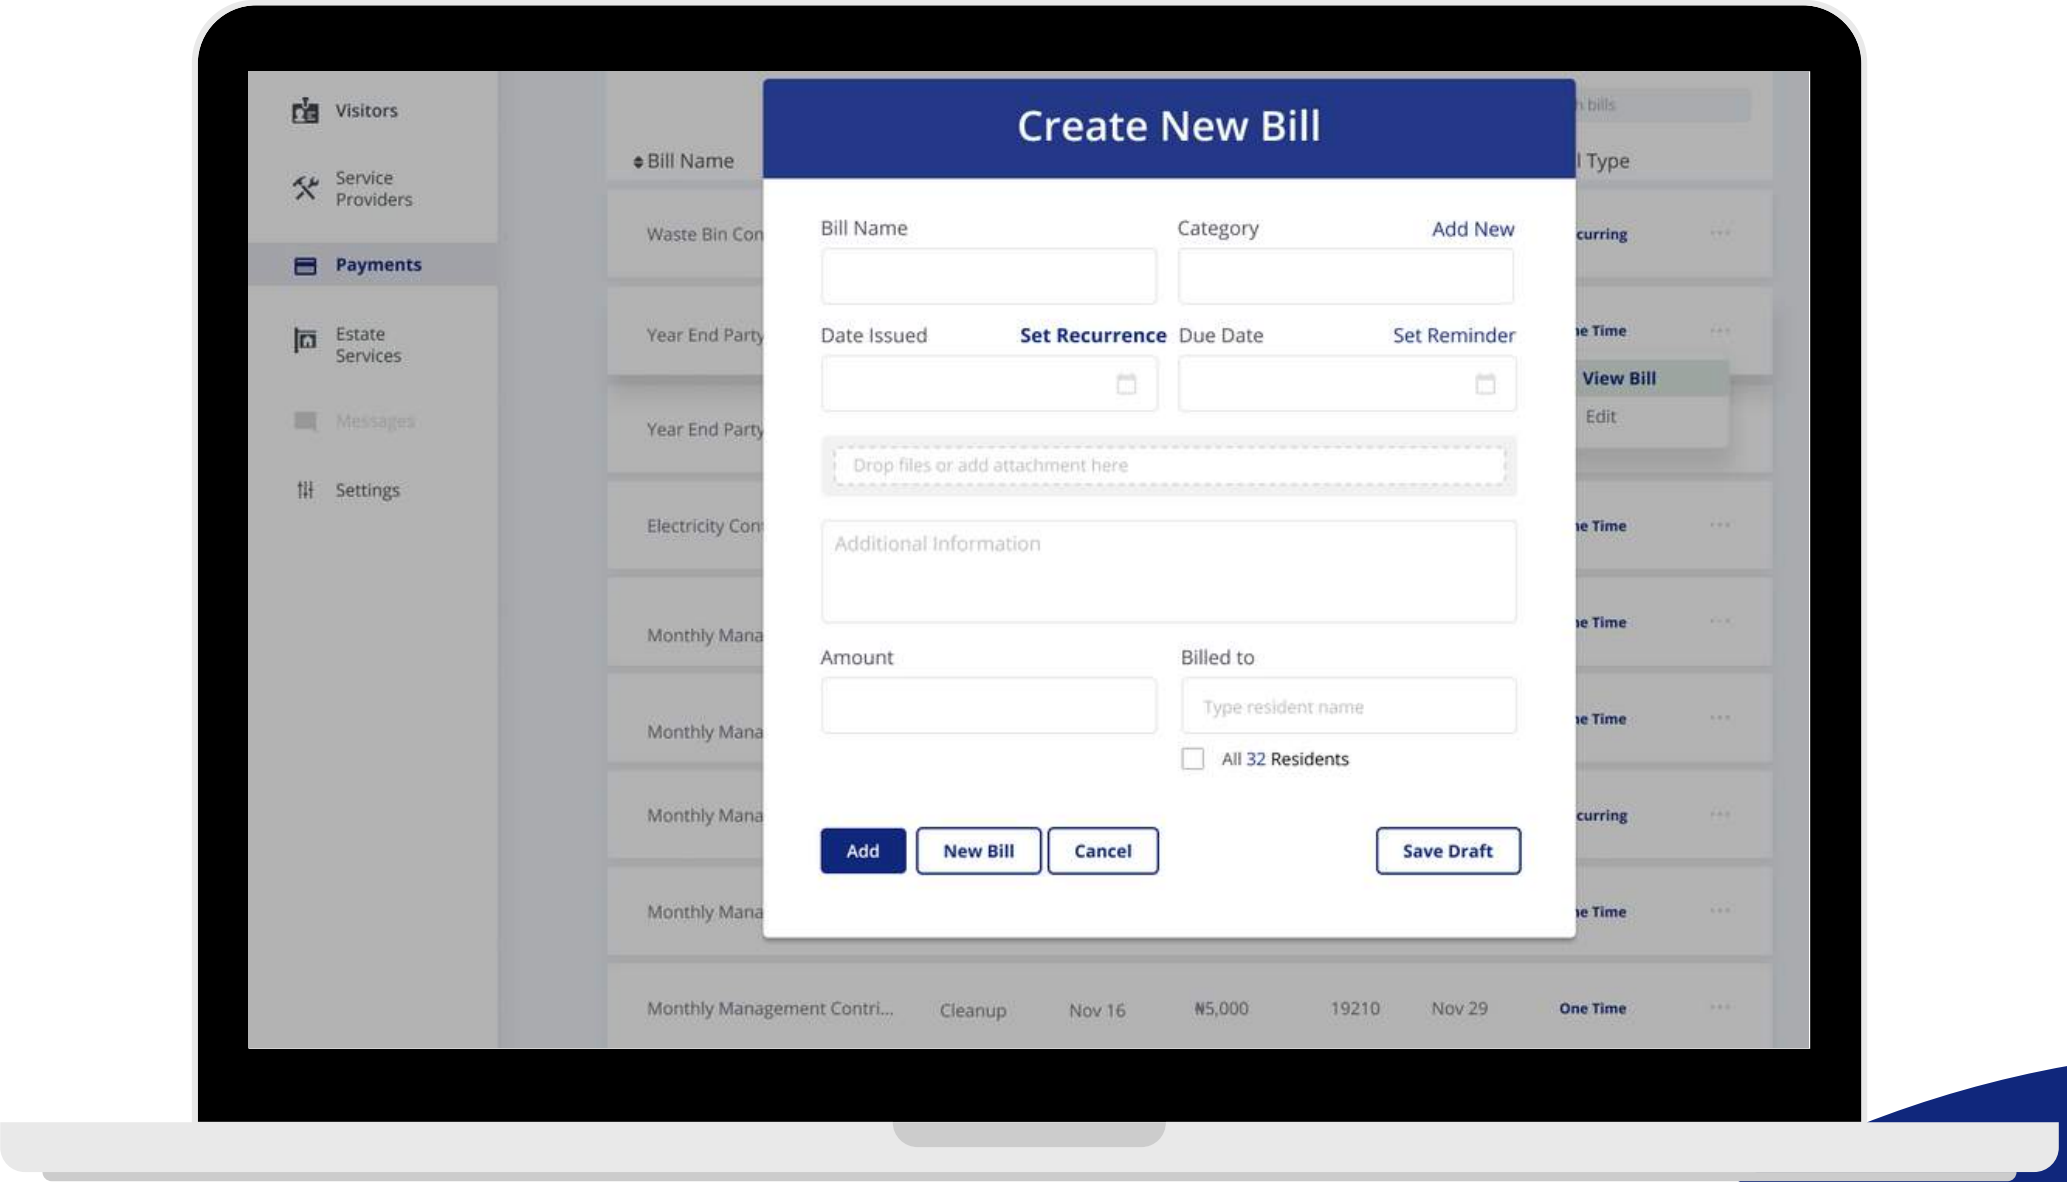

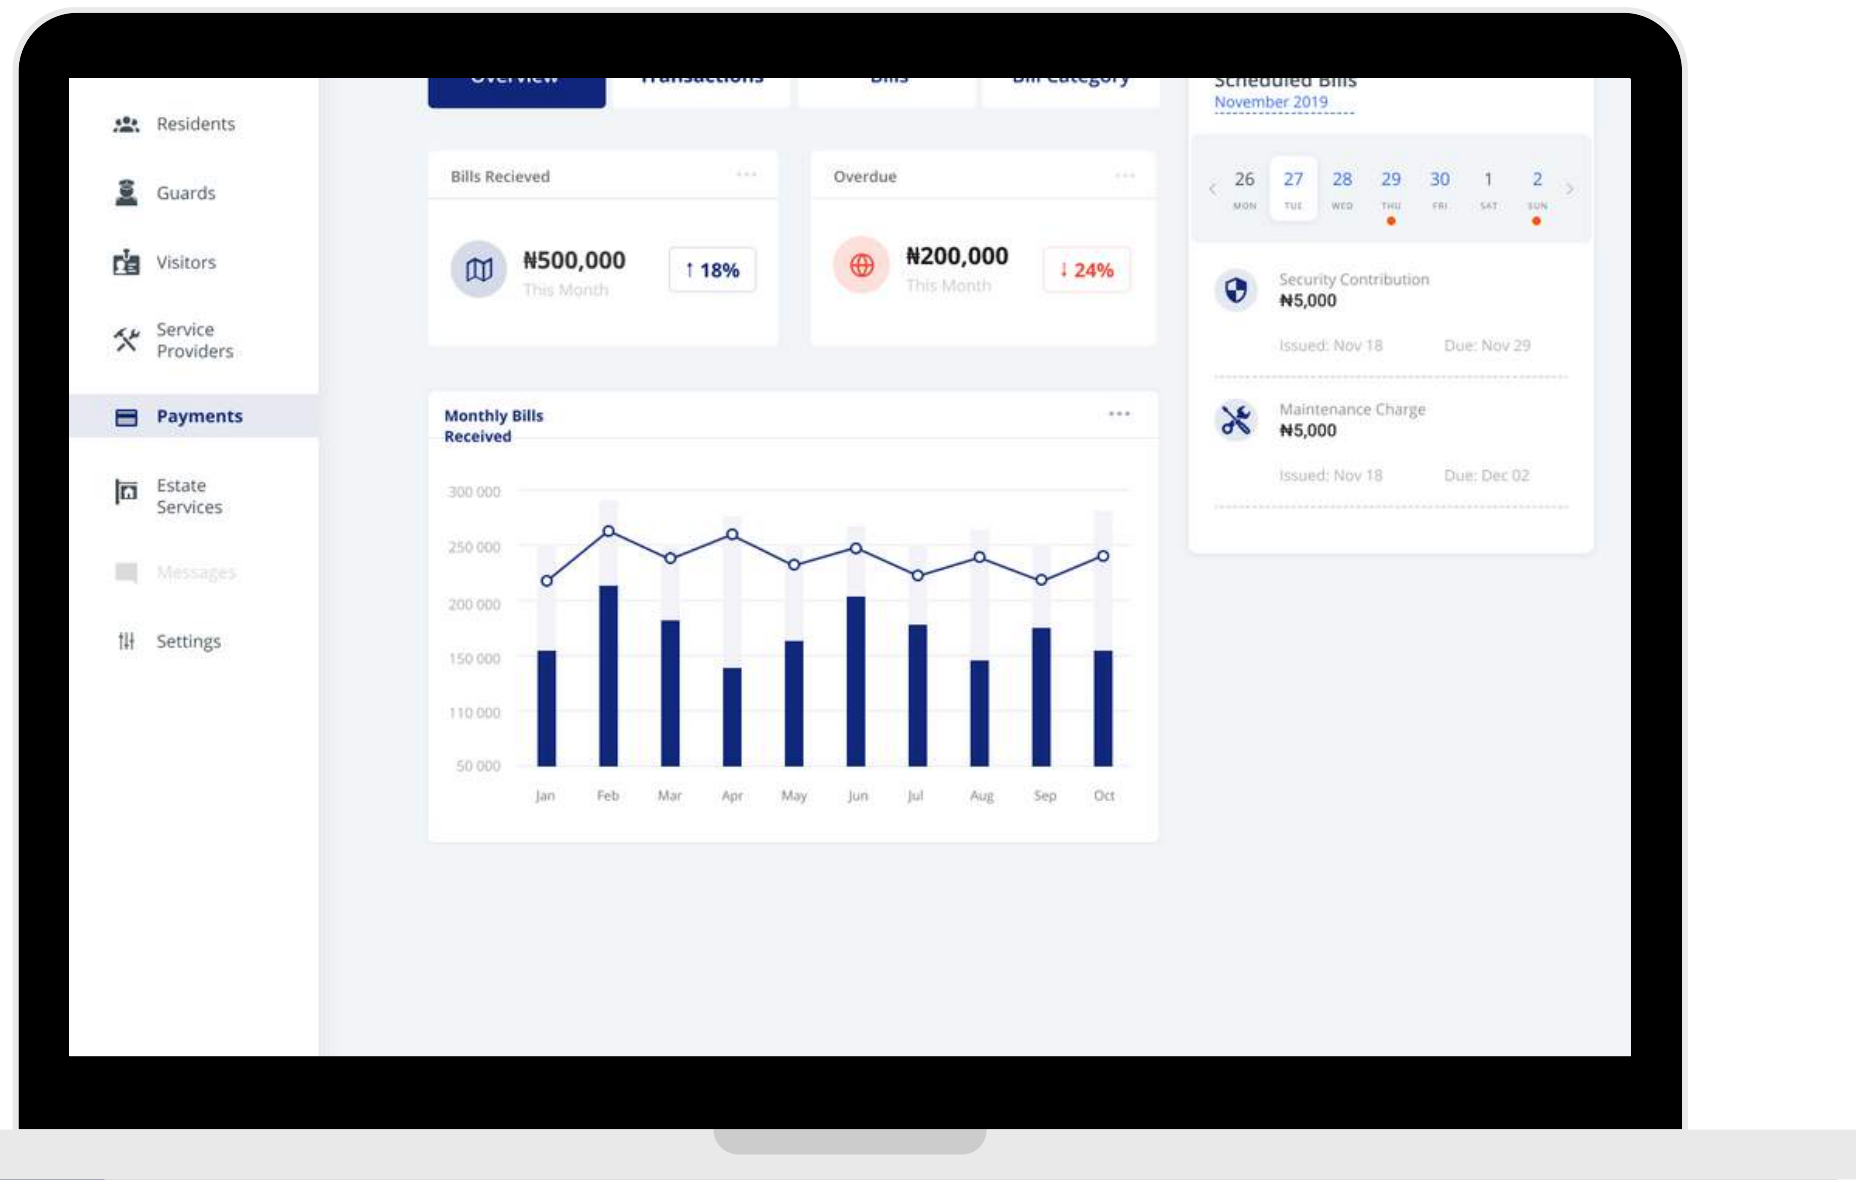

Bill Management

- Estate Managers can generate and keep track of payments from the dashboard.
- Residents can make payments on the app.
- Residents can record payments not made on the app.

Estate Managers can generate any category of bill for residents using our easy to use user interface.

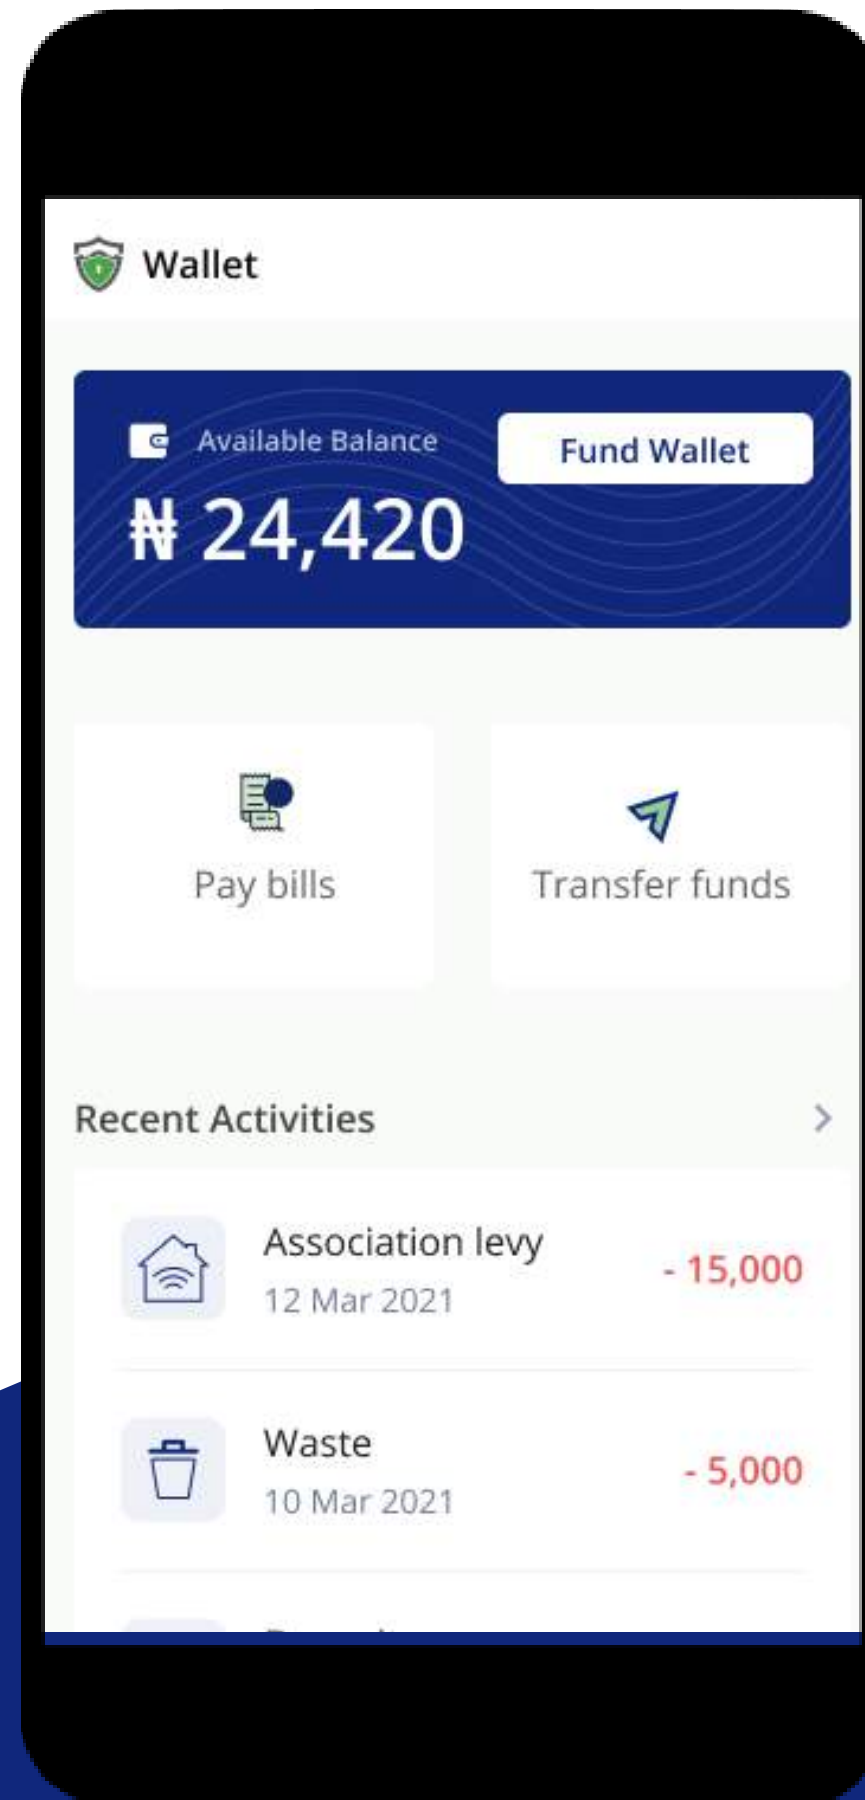

Estate managers can keep track of residents' payments and approve and query offline payments. Also, send email reminders of pending bills to residents.

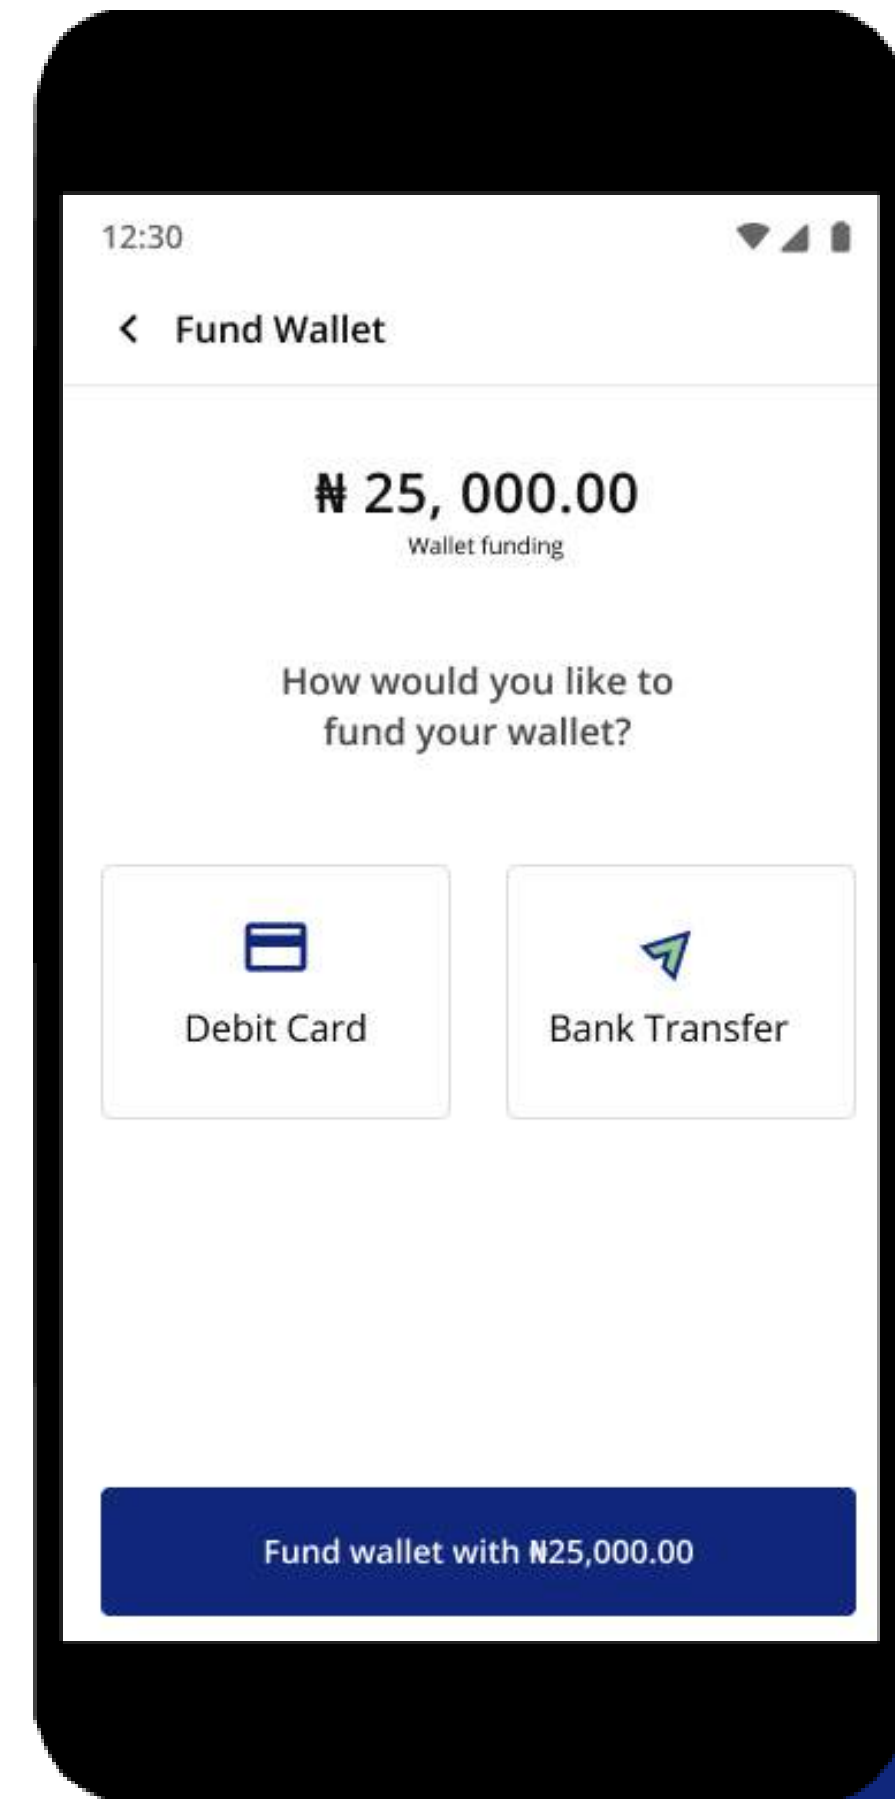

Payment Wallet

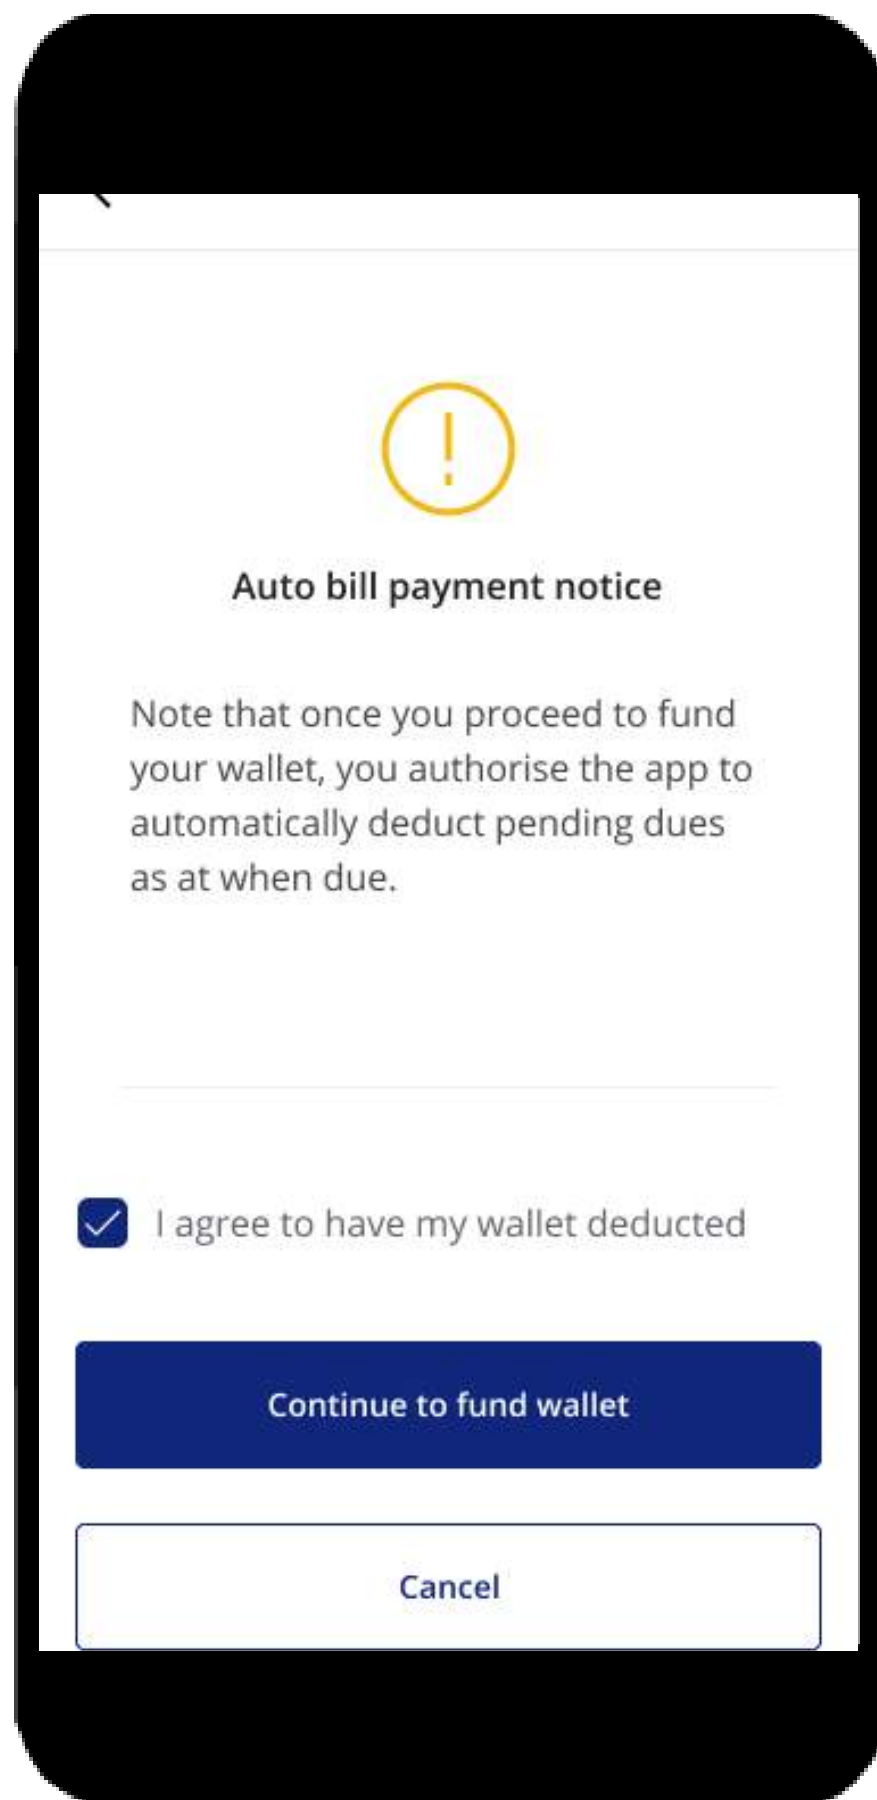

Make bill payment easier
and more accessible to
residents with the Inbuilt
wallet to make and track
payments

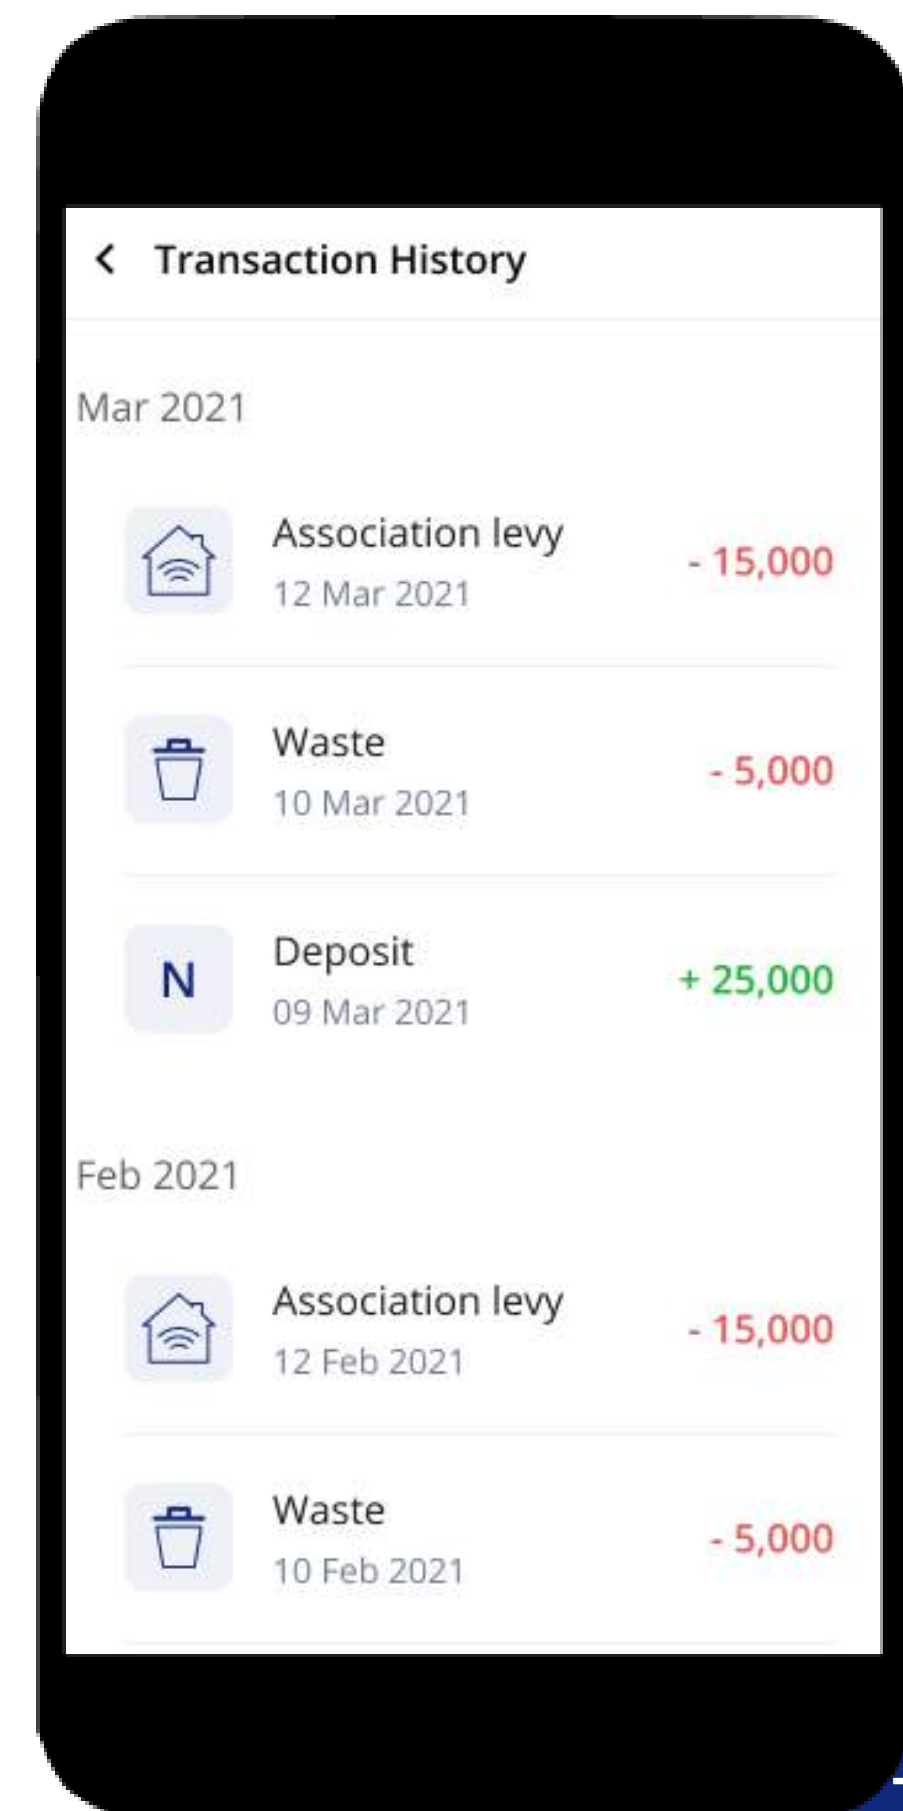

Residents can fund thier wallet safely using trusted third-party payment platform embedded in the app.

Residents can use their wallet balance to make payments easily or be automatically debited per request, and track past payments made.

Visitor Management

Eliminate guest harassment at point of entry by leveraging on our visitor management feature.

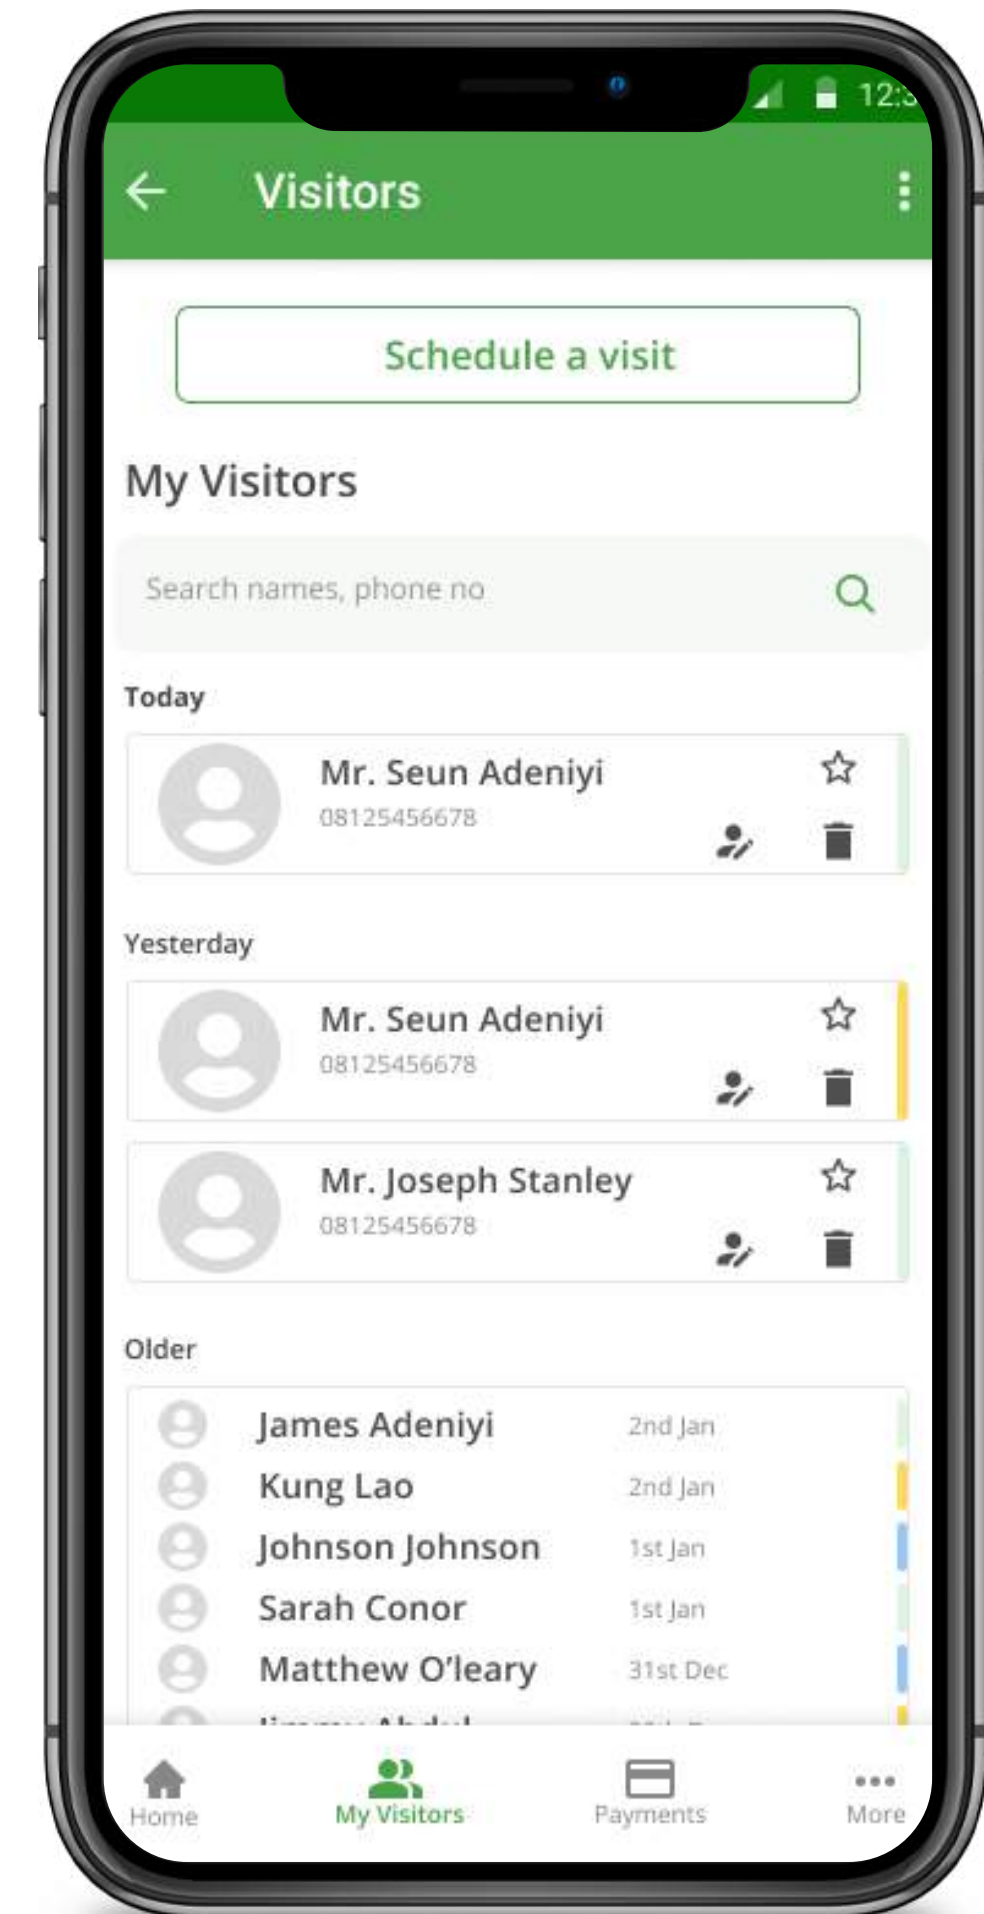

Visitor Management

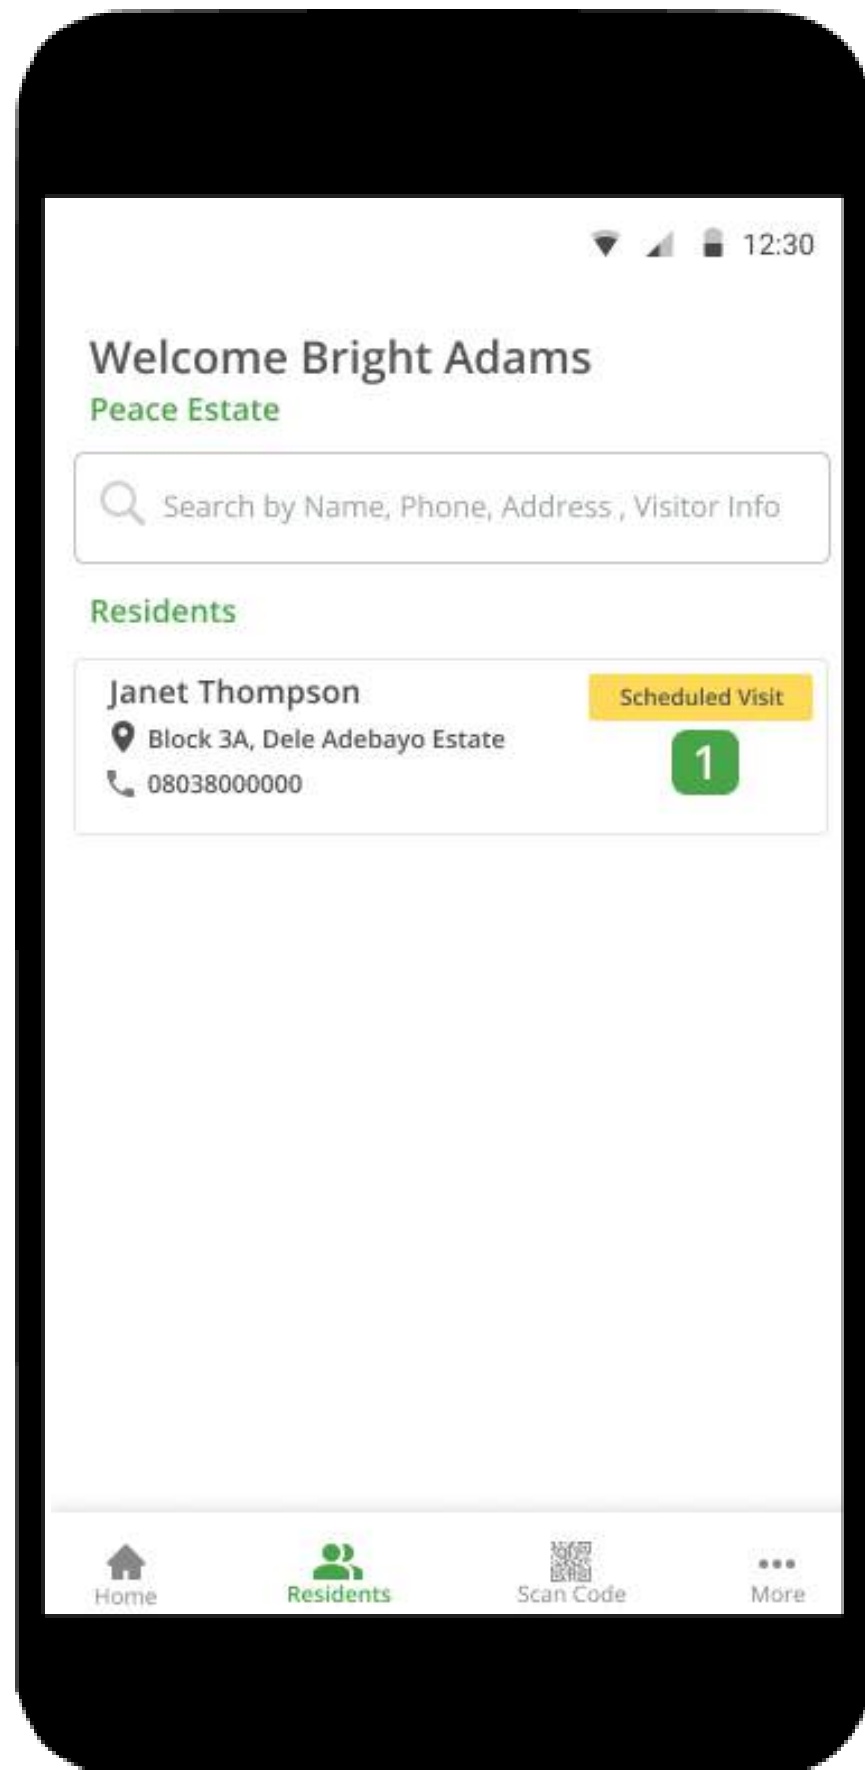

- Residents managed list of allowed visitors
- Guards can admit visitors seamlessly using inbuilt QR code / access token
- Guards can also Admit visitors even when offline
- In-app realtime push notification

Resident managed list of allowed visitors

Parmit is designed to give residents the power to regulate visitors who are allowed in while ensuring that guests are not unnecessarily delayed or harassed at the point of entry.

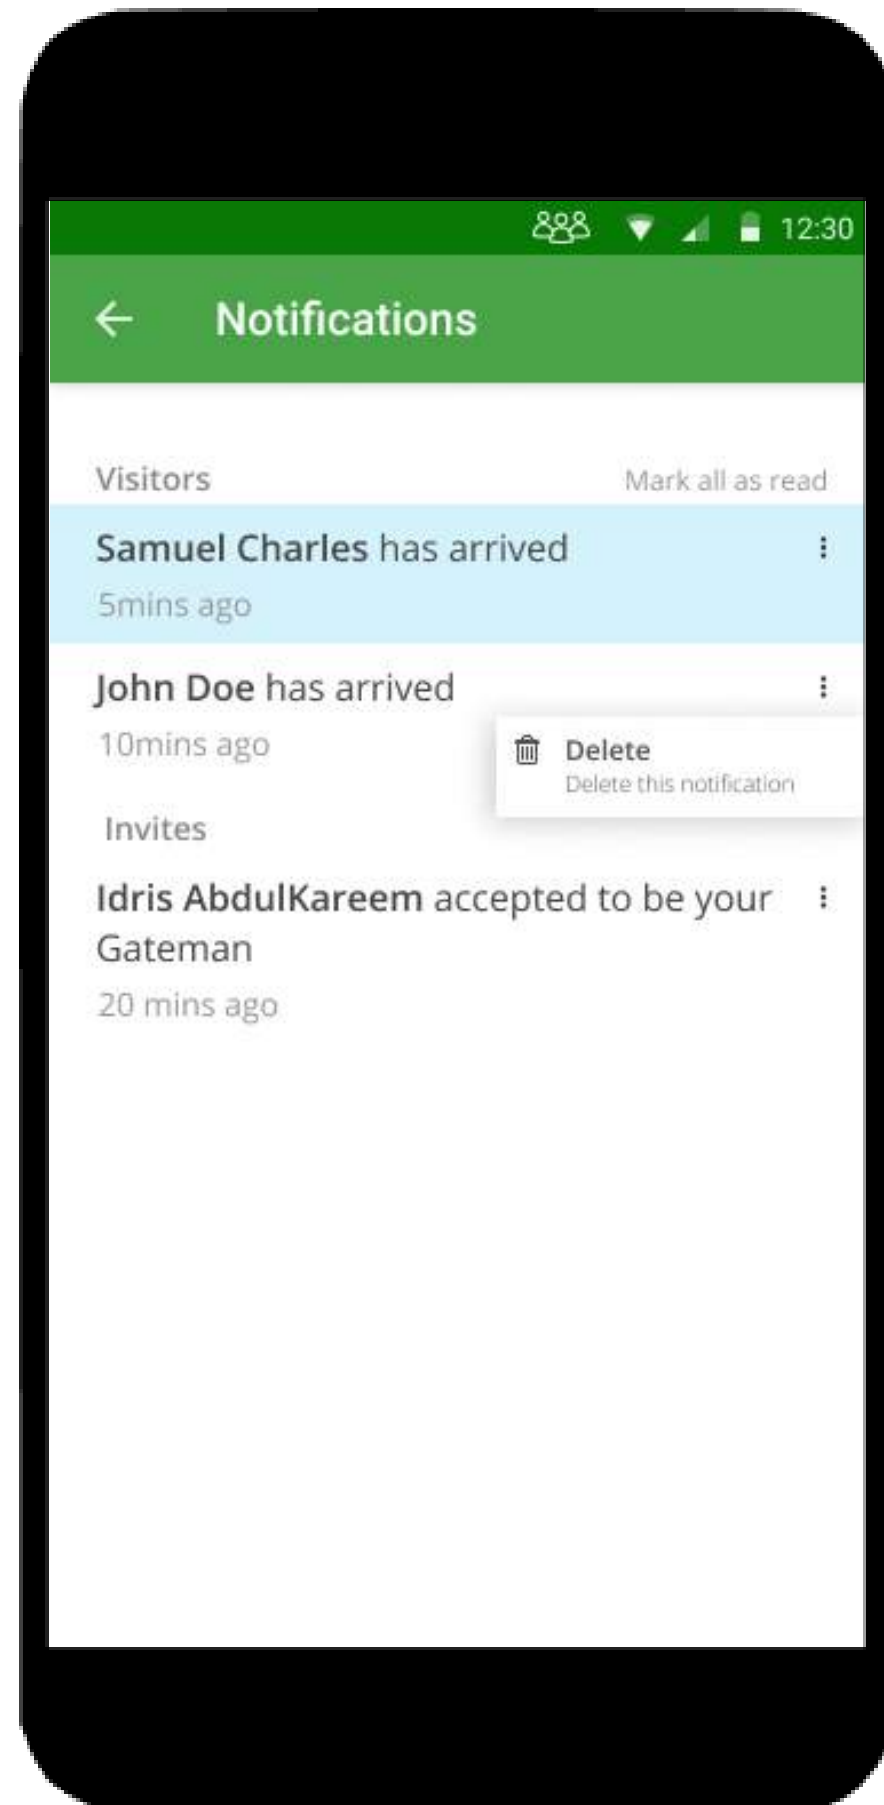

Communication between the resident and security guard about expected guests takes place within the app seamlessly.

Guards can admit visitors seamlessly using inbuilt QR code / access token

Visitors are admitted once their appointment can be confirmed by the gateman either by scanning their code or by retrieving their information from the list of expected visitors on the app.

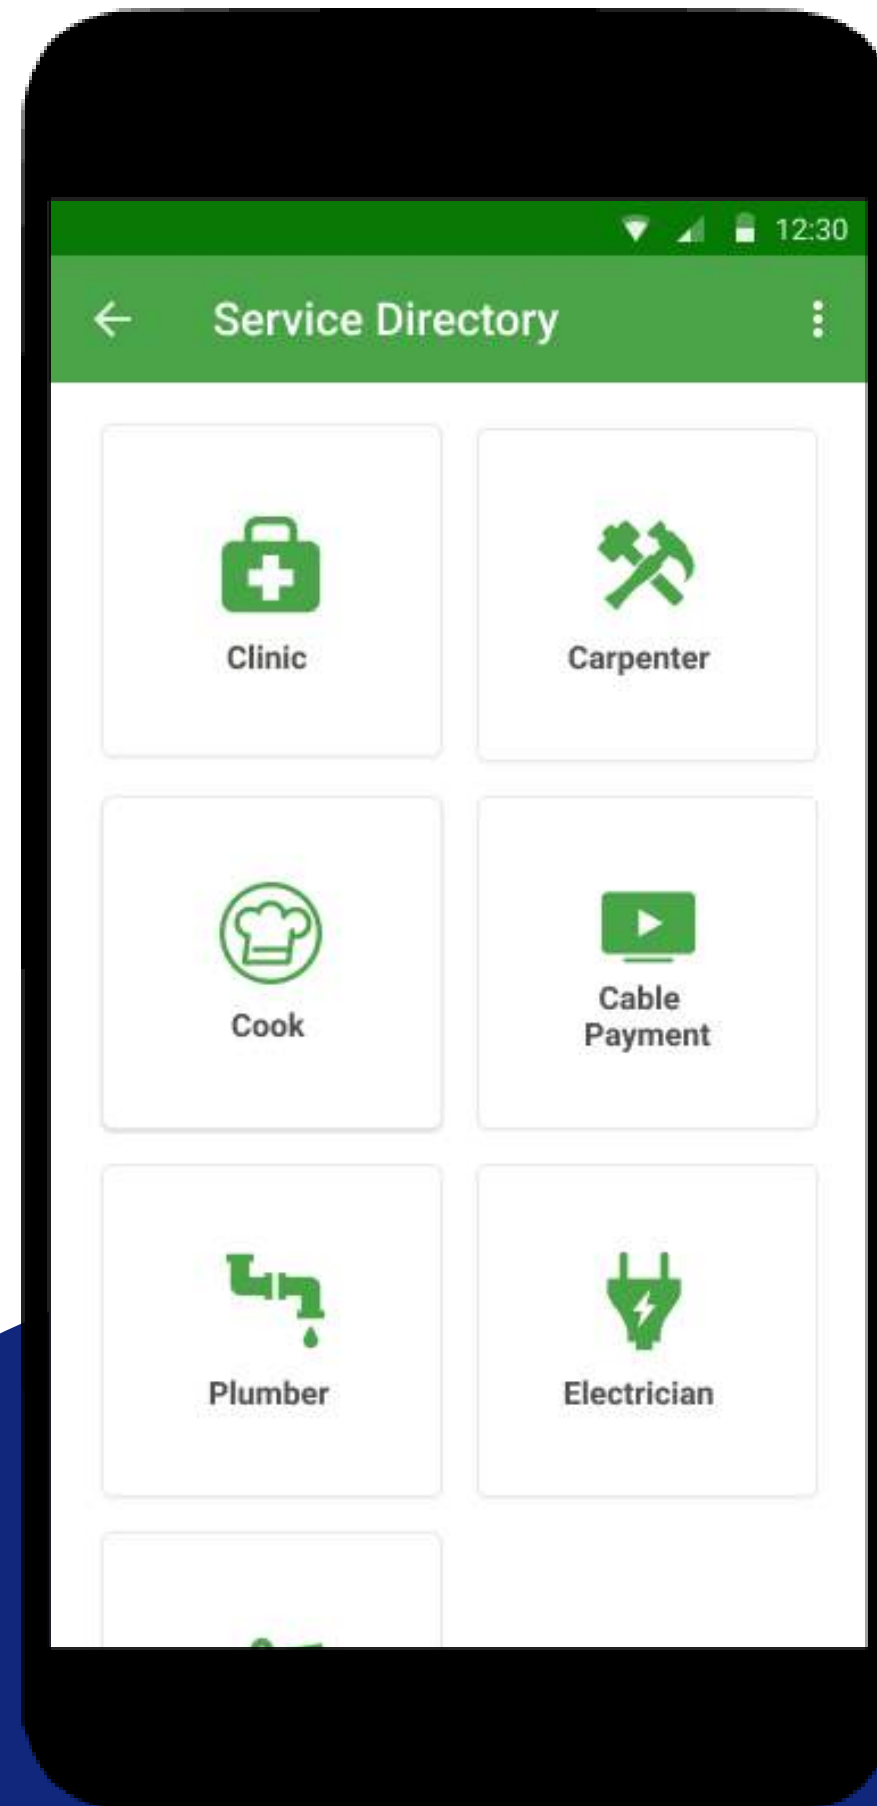

With Real time notifications, residents are informed of the status of their visitors at everypoint of the way.

Service Directory.

Parmit provides a service providers directory which contains details of service providers that are close to their estate's location.

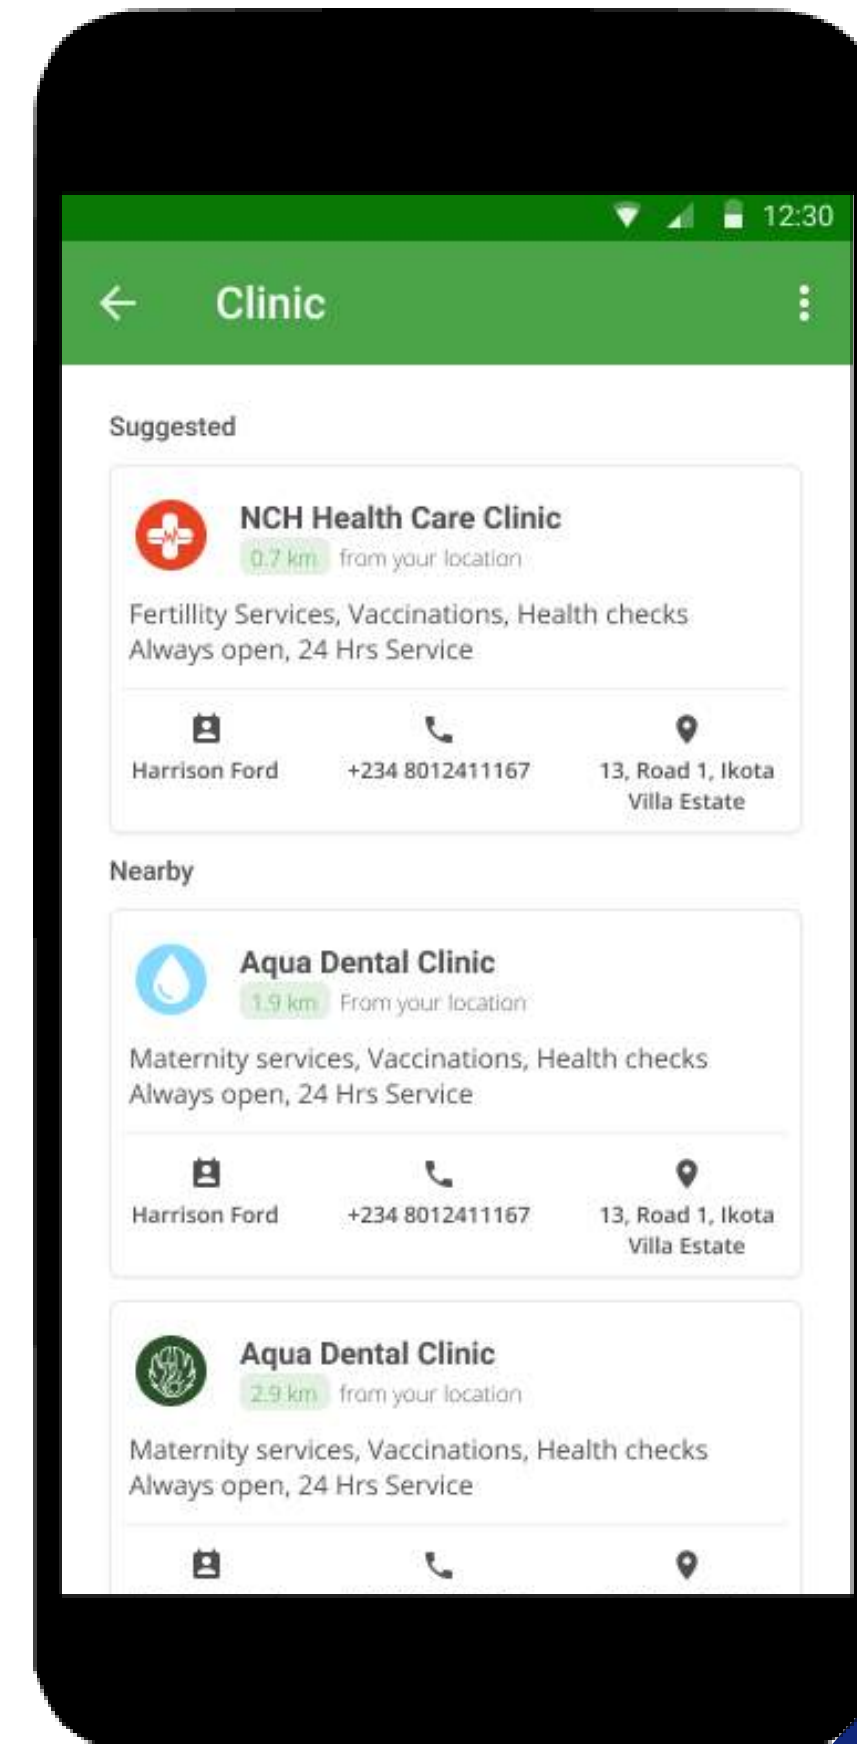

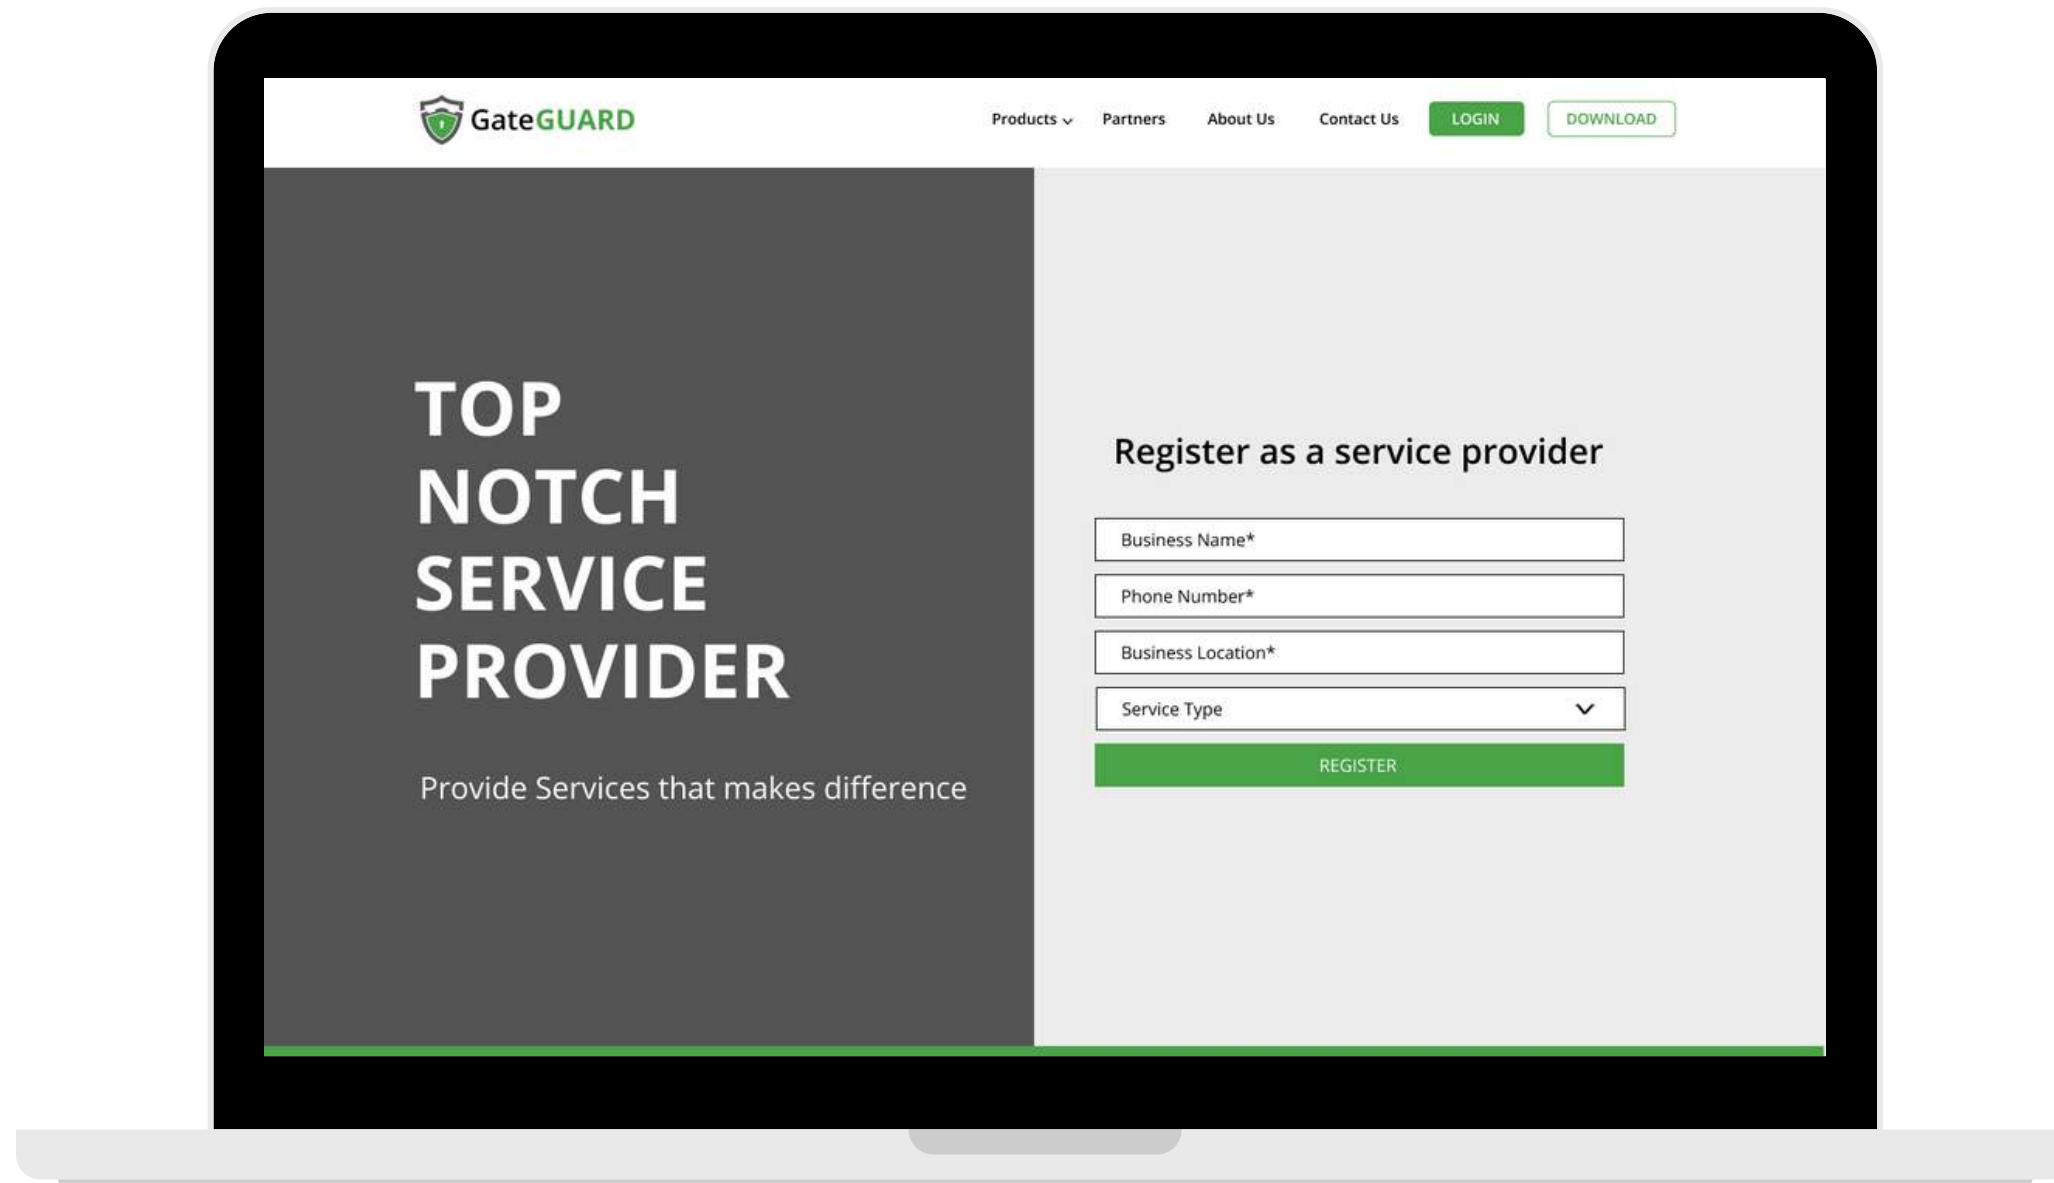

Service Directory

- Give Residents access to a wide range of vetted service providers.
- Generate revenue by having Service providers register to get enlisted on the app
- Maintain full control over service providers and suspend under performing service providers

Give Residents access to a wide range of vetted service providers.

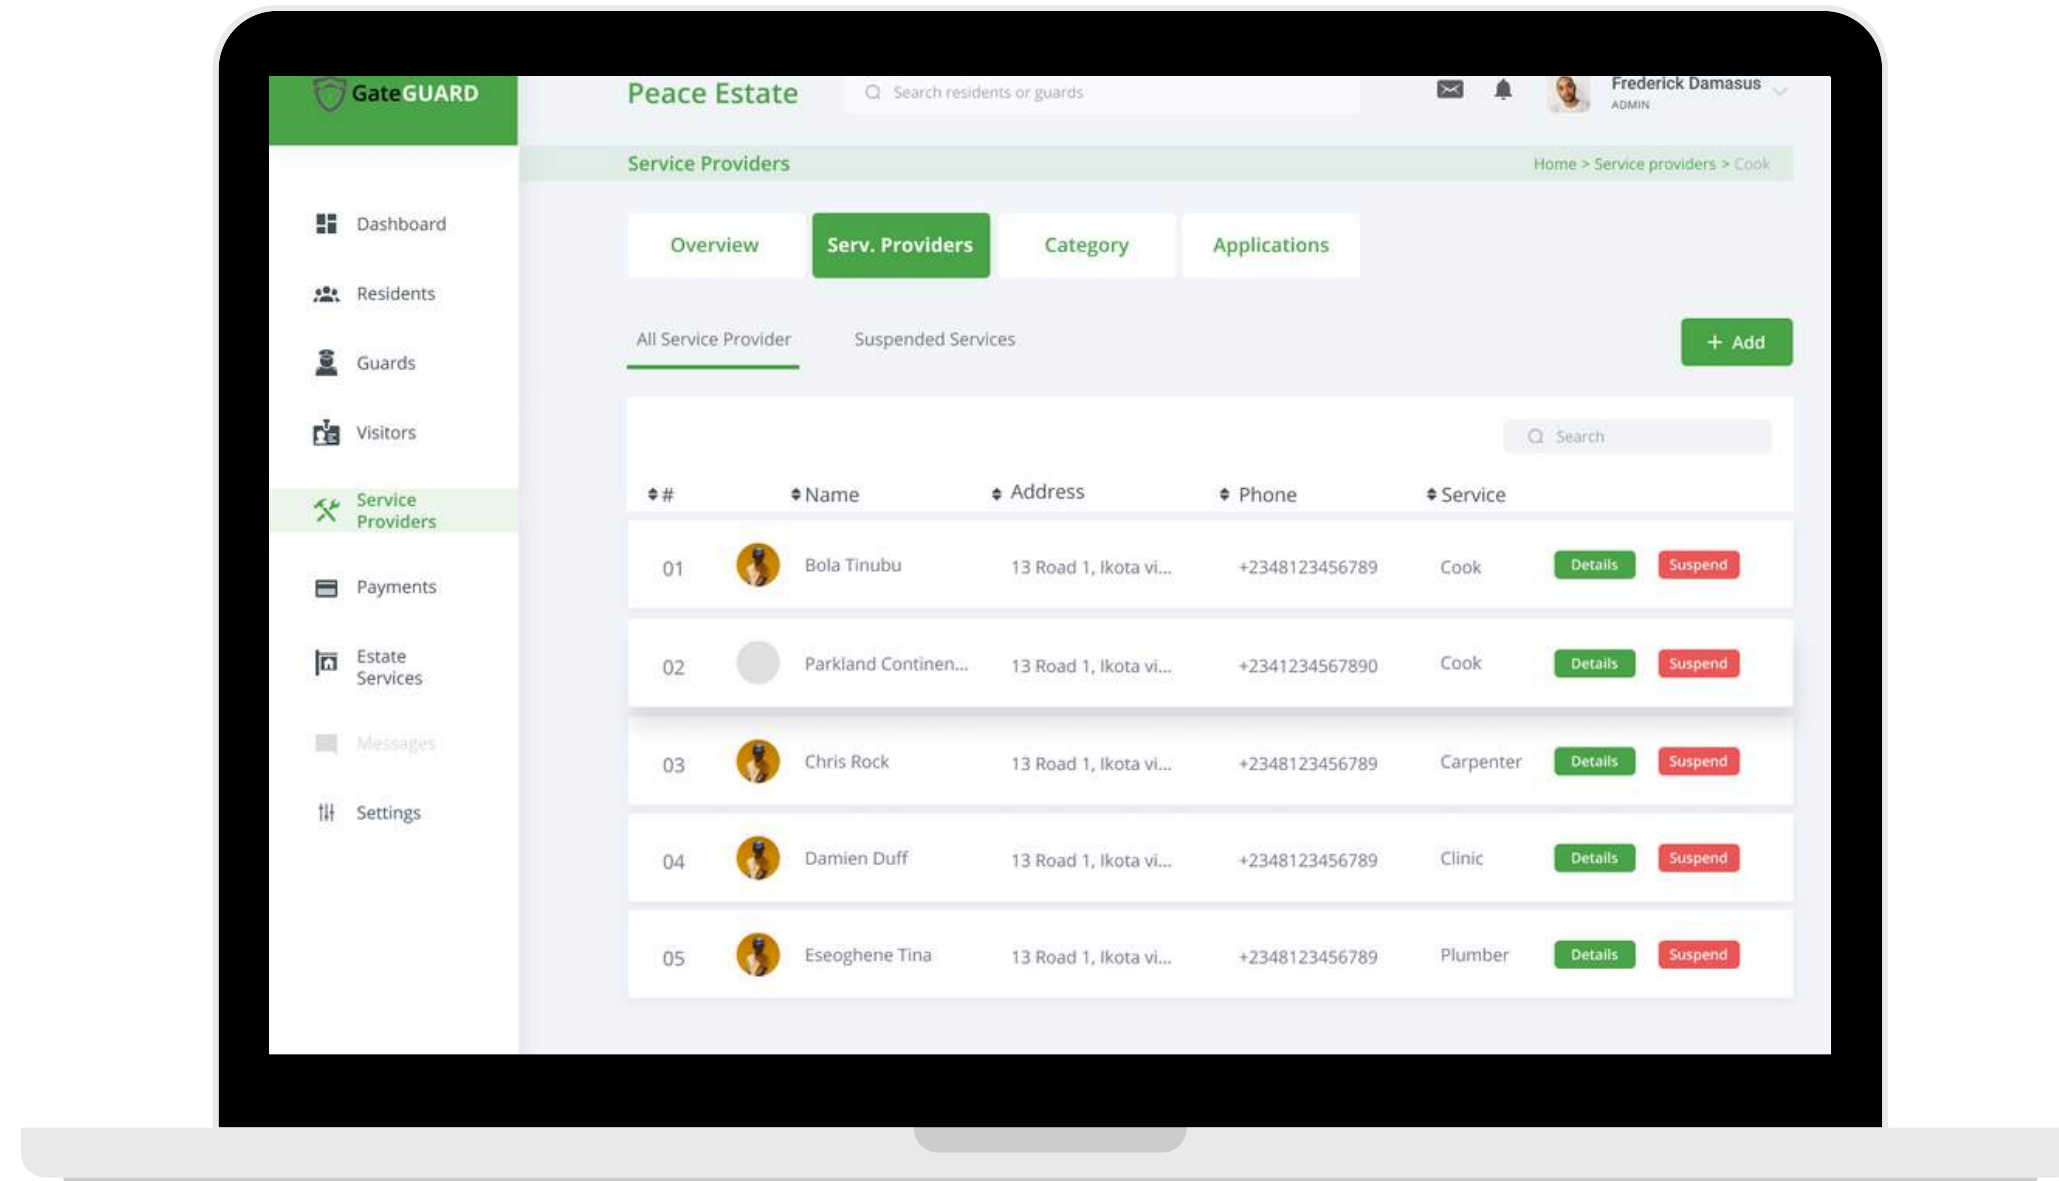

Generate revenue by having Service providers register to get enlisted on the app

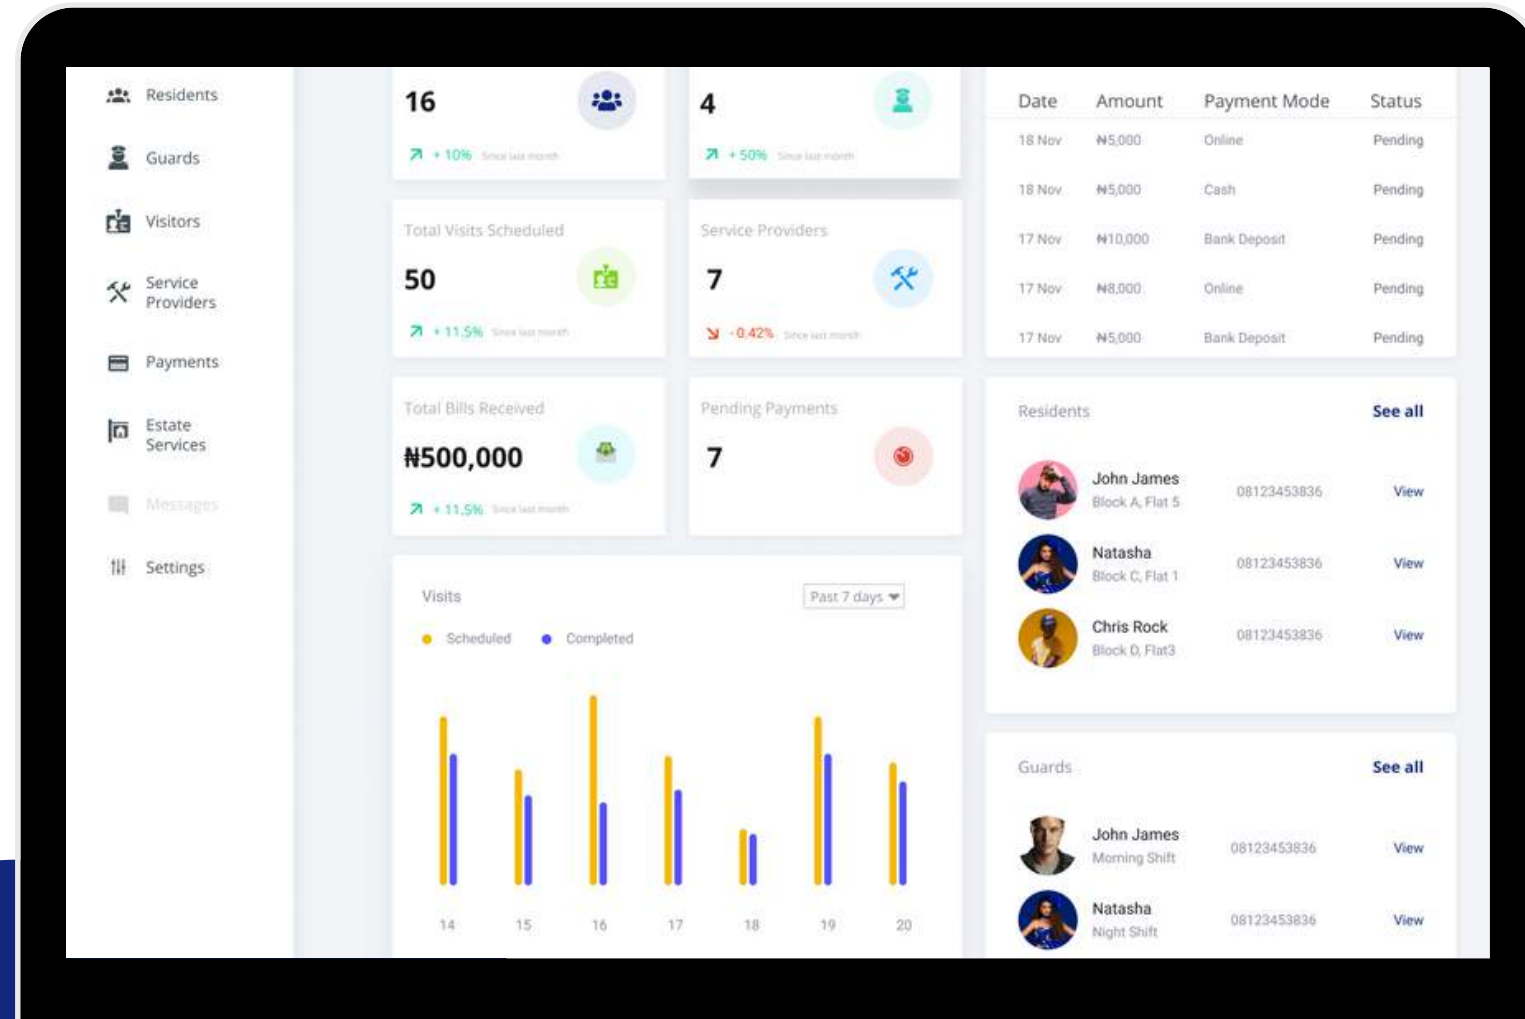

Maintain full control over service providers and suspend under performing service providers

Admin Web Portal

Take total control of your estate via our intuitive admin web portal.

Admin Web Portal

- Manage residents.
- Manage security guards.
- Manage service providers.

Value Proposition

- A one month all-access free trial for all residents
- Afterward billed at ₦3000 per *house signed up on the app monthly
- Discounts are available based on the total number of users

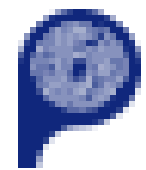

**house: multiple residents in a house are grouped under a house*

Competitive Advantages

How does Parmit stand out ?

How Parmit stands out

USER CENTERED DESIGNED

Following human-centered designs best practices this solution has been built to serve everyone who lives in an estate or gated community. This translates to high adoptability as users need little or no guidance to start using the app.

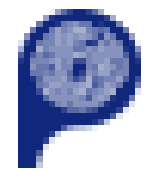

CROSS-PLATFORM AVAILABILITY

Parmit was built on cross-platform technology meaning the app is readily available in IOS and Android Version. This makes updates and maintenance across both platform to be seamless.

How Parmit stands out

FAST, SECURE AND SCALABLE

Leveraging on the benefits of its API based backend technology, the mobile and web app enjoys fast load speed and it is secure against the most dangerous hack threats. Its modularity also makes it easily scalable and flexible to add future features.
